

Proven technology. More individuality.

Elmasonic Select

Elmasonic Select

Custom cleaning performance for a wide range of applications. The new benchmark.

Powerful performance built in.

Elmasonic Select is the ultimate powerful ultrasonic cleaning device for discerning users. Its high-performance functions are guaranteed to impress. Five different ultrasonic modes support users in a wide range of cleaning applications, while four adjustable programmes allow users to start custom cleaning processes at the touch of a button.

The device is easy to use thanks to the large, bright, intuitive display and user-friendly buttons. The patented dry-running protection, which protects the device from overheating, safety switch-off after eight hours and a display protected from the ingress of dirt and moisture all ensure safe operation.

Highlight

MAXIMUM BENEFITS

Developed for

- Research and development labs
- Pharmaceutical and industrial-analytical labs
- Workshops and repair shops
- Metalworking companies
- Industrial component manufacturers
- Watchmakers, jewellers and watch & jewellery studios

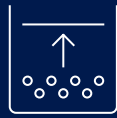

Cleans

- Industrial components and parts
Carburettors and filters
- Watch components
Straps, clasps and cases
- Jewellery
Earrings and bracelets (with/without precious stones)
- Lab instruments
Volumetric measuring equipment, test tubes

Removes

- Resins
- Oils and greases
- Adhesive residues
- Abrasive and polishing pastes
- Chips
- Flux
- Organic contaminants
Horn and skin residues
- Build-ups of dirt and grime

Prepares samples for

- Degassing
- Homogenisation
- Emulsification
- Dispersion
- Lysis
- Disagglomeration
- Thermosensitive process

Outstanding cleaning results. Reproducible and reliable.

Uncompromising cleaning power.

The high-performance Elmasonic Select product family includes a total of eleven different device sizes. These range from the small 3-litre device to the large 90-litre version, meaning there is something to suit every user's needs. Items of all different shapes and sizes and from a wide range of different applications can all be

cleaned in the device. All devices are equipped with a heater as standard. The new patented modular basket and other practical accessories round off the cleaning process.

For every cleaning situation.
Safe and convenient cleaning. Every time.

Eco mode: The „Gentle“ – Gentle cleaning with energy-efficient, value-preserving and quiet operation.

Sweep mode: The „Homogenous“ – Even distribution of ultrasonic power for most cleaning tasks.

Pulse mode: The „Powerful“ – Removes stubborn dirt using pulsating sound field distribution.

Dynamic mode: The „Multi-talent“ – Combines the pulse and sweep modes for increased cleaning performance.

Degas mode: The „Preparer“ – Rapid degassing of (HPLC) samples and freshly prepared cleaning solutions.

Functions

Elmasonic Select

Versatile.
Always user-friendly.
Impressive performance.

Devices in the Select series are equipped with an ultrasonic frequency of 37 kHz, 5 ultrasonic modes, the option to save up to 4 custom cleaning programmes, a heater and a tank volume from 3 to 90 litres, enabling them to excel in any cleaning task they are faced with.

Highlights

Intuitive operation.

Large, easy-to-use buttons with clear button assignment, intuitive function selection, acoustic feedback and easy-to-understand symbols support users throughout the cleaning process.

Safe operation.

Devices in the Select series boast special performance features, which include quiet operation, dry-running protection and safety switch-off after 8 hours. The closed front surface also prevents the ingress of dirt and moisture.

Brilliant display.

The large, bright display with its extremely wide viewing angle helps the user to see all the important information during cleaning. Additional symbols for special functions allow individual operating sequences.

Powerful functions.

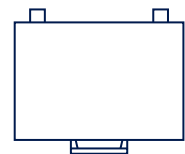

The Select series offers many options for controlling the cleaning process: 4 individually adjustable programs, 5 powerful ultrasonic modes, temperature-controlled start, quick start function, adjustable limit temperature and automatic degassing.

Elmasonic Select accessories

Clever ideas. Effective solutions. Innovative products. Simply practical.

Elma offers an extensive range of user-oriented accessories for the widest variety of cleaning tasks in different industries – such as watches, lenses, jewellery, laboratory or industry.

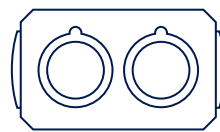

NOISE PROTECTION

Reduction of the noise level in the cleaning process by up to 54%.

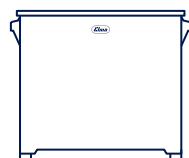

HOLDERS*

Items to be cleaned are positioned clearly and securely in the basket.

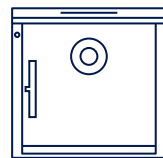

INSERTS*

Inserts prevent damage to the ultrasonic tank from the items to be cleaned.

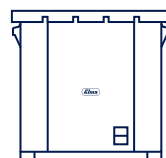

ELMA SINK

Remove any remaining dirt after the cleaning process.

ELMA MUTEBOX

Optimal cleaning: hygienic, low-noise and environmentally friendly.

ELMA DRY

Efficient component drying: fast, safe to use and gentle on materials.

* Accessories available in different sizes and models for different applications and devices.

MORE CHOICE

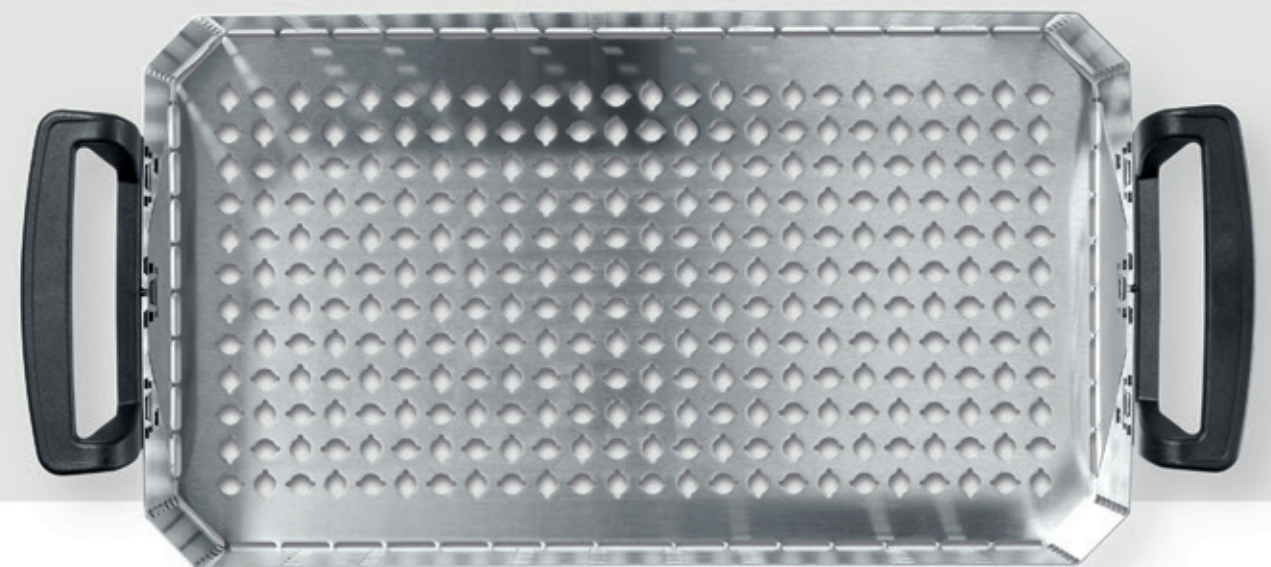

Technology from Elma is much more than just the cleaning devices themselves. With our accessories you can customise the Select series to your individual requirements.

Cooling coil
Material: Stainless steel

Elma Basket

VERSATILE AND
CUSTOMISABLE

Elma cleaning chemicals

Achieve optimal cleaning results with the right application of Elma chemicals.

In our in-house process laboratory, qualified chemists develop highly effective products for various cleaning processes. These are produced at Elma and put to use in various industries.

Industry solutions

Elma Luxury Clean.

Whether bleaching articles or removing grease, oils or polishing agents – the different products in this series enable first-class cleaning results for watches and jewellery, and ensure the longevity of the materials used.

Elma Opto Clean.

Elma Opto Clean supports the cleaning of eyewear – both plastic and metal frames as well as glass coatings are gently cleaned. Manufacturers of precision lenses benefit from residue-free cleaning results.

Elma Tec Clean.

Elma's range of cleaners is designed for a diverse range of cleaning tasks in industrial parts cleaning. Subsequent processes, such as coatings, can be carried out safely and to a high quality after ultrasonic cleaning.

Elma Lab Clean.

The range of cleaners for laboratory settings is designed to meet the needs of analytical laboratory instruments and glassware. All cleaners are used for intensive ultrasonic cleaning – this cleaner series is also suitable for laboratory rinsing machines.

Optimal cleaning results.

The really tough cases are our speciality. This is where the quality of our products really gets to shine.
